

Updating Forge

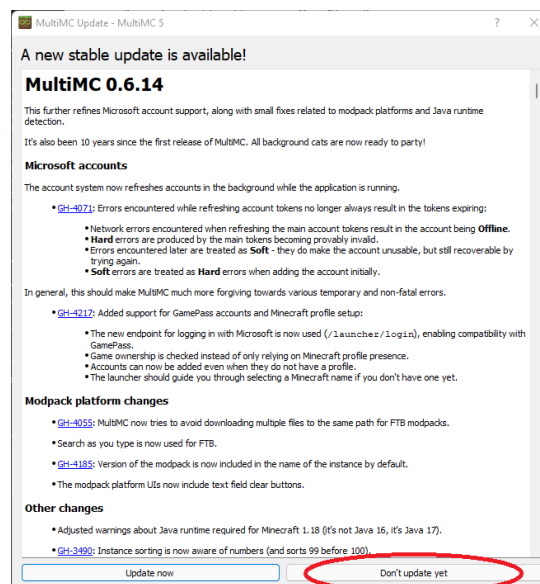

Things To Know:

- Sometimes updating forge might be necessary to connect to the server.
- It must be updated to the same version as the server, ask your administrator if you're unsure which version to update to.

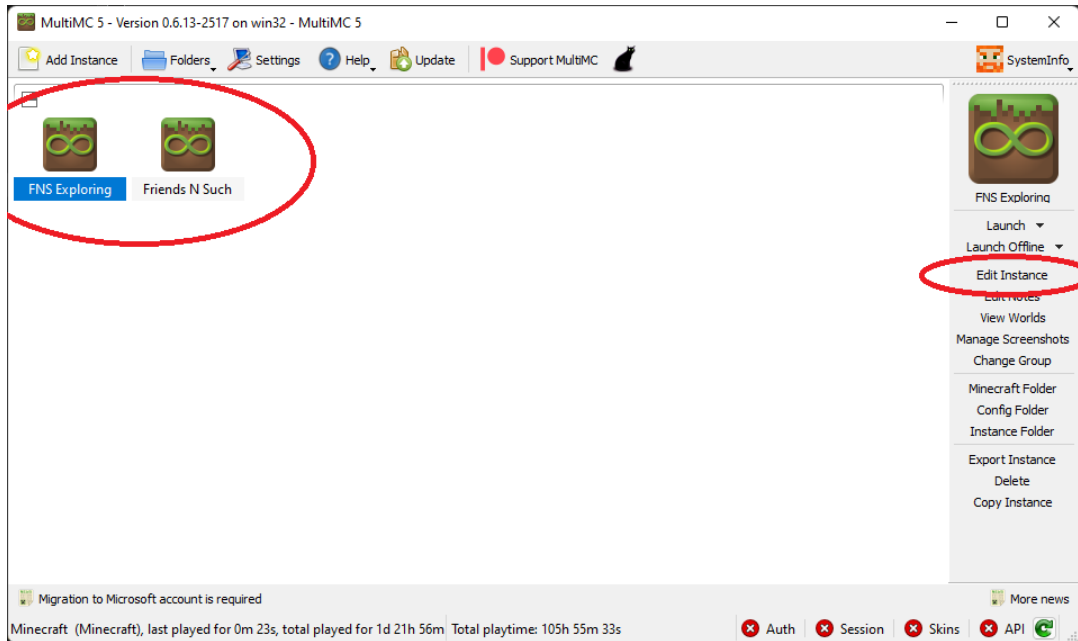

1. Open the Friends N' Such launcher
2. Press 7 to open MultiMC

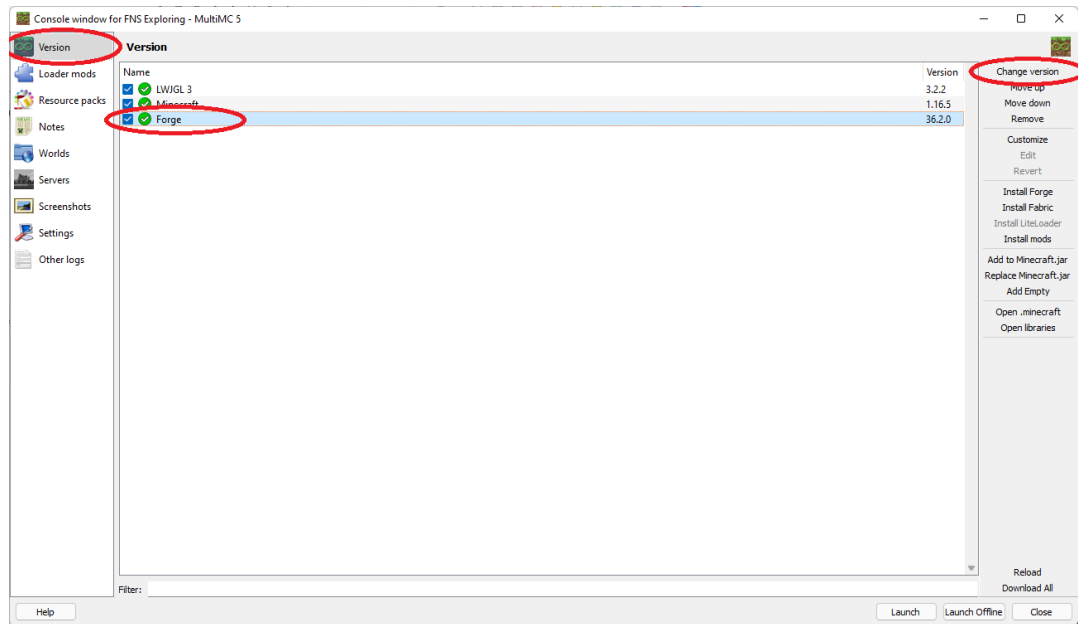

3. If you are prompted for an update, press "Don't Update Yet"

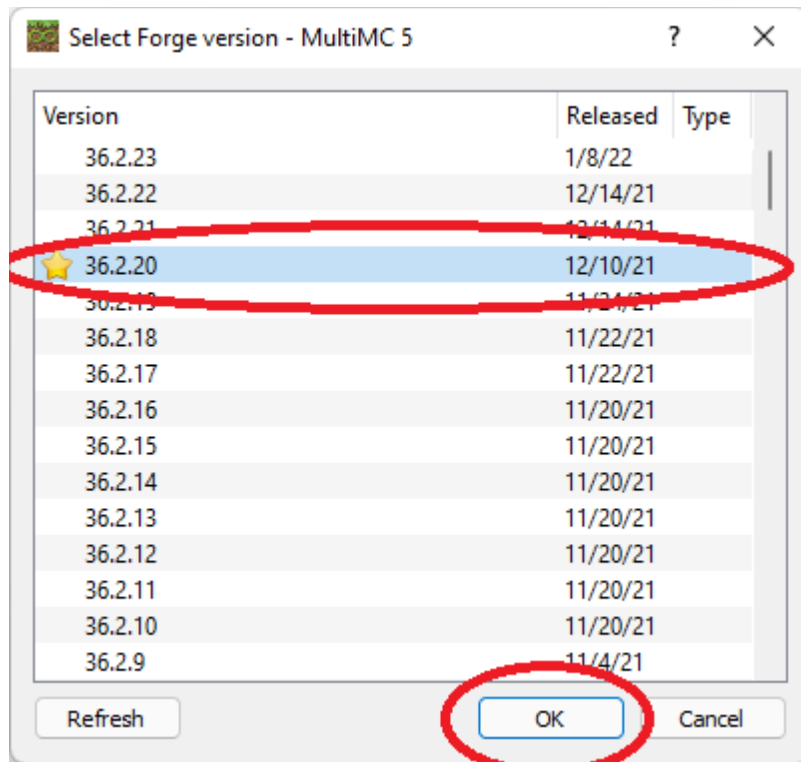

4. MultiMC may be minimized. Open it from the task bar. Select which instance you wish to update by **single** clicking, then press “Edit Instance”

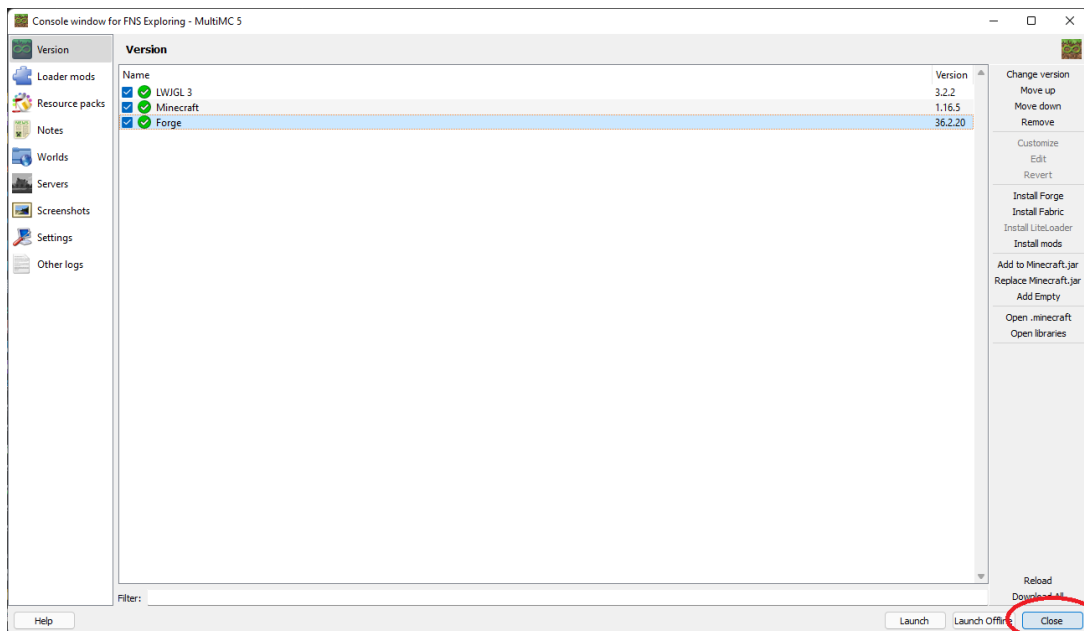

5. On the version tab, select “Forge” then select “Change Version”

6. Scroll up to the version you are updating it to, select it, press “OK”

7. Once it updates (should only take a moment) Hit close

- Find MultiMC in the taskbar and close that too.

- You will need to close and re-open the Friends N Such Launcher.

```
Friends N Such Minecraft Launcher
3) Import Config
4) Reset Mods (Force Update)
5) Reset Instance
6) Full Reset
7) Open MultiMC menu (Settings, accounts)
8) Toggle Better Foliage (Requires additional Resources)
9) Open Latest Log
X) Exit | [R] Refresh
